МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 120 (162) (1983), вв. 1–4
MATHEMATICS OF THE USSR-SBORNIK
Volume 48, Numbers 1–2, 1984

AUTHOR INDEX

Baranovskiĭ, F. T. *The Cauchy problem with modified initial data for the generalized Euler-Poisson-Darboux equation* 141
Barsegyan, G. A. *A proximity property of the a-points of meromorphic functions* ... 41
Bogatyrev, A. V. *Continuous branches of multivalued mappings with nonconvex right side* 339
Budinas, B. L. *The selector principle for analytic equivalence relations does not imply the existence of an A_2 well ordering of the continuum* 159
Buslaev, V. I., Gonchar, A. A. and Suetin, S. P. *On convergence of subsequences of the mth row of a Padé table* 535
Chakhkiev, M. A. *Exponential polynomials of least deviation from zero and optimal quadrature formulas* 273
Dubrovin, N. I. *An example of a chain prime ring with nilpotent elements* 437
Epifanov, O. V. *Multiplication operators in spaces of entire functions of finite order and operators of convolution type* 499
Faminskiĭ, A. V. See Kruzhkov, S. N.
Galaktionov, V. A. and Samarskiĭ, A. A. *Methods of constructing approximate self-similar solutions of nonlinear heat equations. III* 1
Gluskin, E. D. *Norms of random matrices and widths of finite-dimensional sets* 173
Gonchar, A. A. See Buslaev, V. I.
Gribkov, I. V. *The multidimensional problem of the correctness of Schur's theorem* 423
Ignatenko, V. F. *On invariants of finite groups generated by reflections* 551
Iosif'yan, G. A. See Oleĭnik, O. A.
Kalinin, V. L. *Analytic properties of the convolution of Siegel modular forms of genus n* 193
Kardashov, V. R. *Structure of the spectrum and estimates for the eigenvalues of nonlinear homogeneous operators* 349
Kasarin, L. S. *Automorphisms, factorizations and Sylow-type theorems* 183
Klyachko, A. A. *Models for the complex representations of the groups* $\mathrm{GL}(n, q)$ 365
Kondratyuk, A. A. *The Fourier series method for entire and meromorphic functions of completely regular growth. III* 327
Kruzhkov, S. N. and Faminskiĭ, A. V. *Generalized solutions of the Cauchy problem for the Korteweg-de Vries equation* 391
Krylov, N. V. *On degenerate nonlinear elliptic equations* 307

Kucherenko, V. V. and Osipov, Yu. V. *The Cauchy problem for nonstrictly hyperbolic equations* 81

Lyapidevskiĭ, V. Yu. *A mixed problem for a nonhomogeneous quasilinear hyperbolic system of equations* 201

Martirosyan, V. A. *On uniform complex approximation by lacunary polynomials* ... 445

Nesterova, T. N. *The method of matching asymptotic expansions for the solution of a hyperbolic equation with a small parameter* 541

Nguen T'en Taĭ [Nguyen Tien Dai]. *On estimates for the orders of zeros of polynomials in analytic functions and their application to estimates for the relative transcendence measure of values of E-functions* 111

Oleĭnik, O. A., Iosif'yan, G. A. and Panasenko, G. P. *Asymptotic expansion of solutions of the system of elasticity theory in perforated domains* 19

Osipov, Yu. V. See Kucherenko, V. V.

Panasenko, G. P. See Oleĭnik, O. A.

Petrushko, I. M. *On boundary values in $L_p, p > 1$, of solutions of elliptic equations in domains with a Lyapunov boundary* 565

Pyt'ev, Yu. P. *Reduction problems in experimental investigations* 237

Rozanov, Yu. A. *On certain generalizations of the Dirichlet problem* 287

Samarskiĭ, A. A. See Galaktionov, V. A.

Shmelev, G. S. *Invariant operators on a symplectic supermanifold* 521

Stepanov, V. D. *On a problem for integral convolution operators* 211

Stepanov, V. L *On the theory of models for intuitionistic logic* 223

Suetin, S. P. *On poles of the mth row of a Padé table* 493

_____. See Buslaev, V. I.

Turaev, V. G. *Cohomology rings, linking forms and invariants of spin structures of three-dimensional manifolds* 65

Yashnikov, V. P. *The structure of $\mathcal{H}_2$-optimal solutions of the inverse kinematic problem of diffraction from polycrystalline objects* 381

Zholondek, Khenrik. *On the versality of a family of symmetric vector fields in the plane* 463
